## Bollard Lifter Instructions

With the bend in the handle facing down, slide Bollard Lifter down over the top of the bollard.

Then raise up on the the lifter handle so that the lifter grips the bollard.

Once the Bollard Lifter has griped the bollard raise the bollard up and out of the bollard sleeve embedded in the ground or finished surface.

You should always bend your knees and lift with your legs when raising the bollard up and out of the bollard sleeve.
